

## **Encryption Anywhere, Anytime with Randtronics DPM easy2Go**

***Randtronics DPM easy2Go offers on-the-go encryption for secure sharing of sensitive digital materials across any platform.***

***DPM easy2Go bolsters data security for organizations by safeguarding information "in transit" across networks, preventing any attempts at interception or eavesdropping.***

### ***DPM easy2Go protects everyday sharing***

Randtronics DPM products bolster digital security for organizations by employing comprehensive encryption strategies, significantly reducing the chances for cybercriminals to access and exfiltrate sensitive data. This approach addresses the critical need to safeguard information beyond traditional methods, adapting to evolving cyber threats.

Organizations are increasingly aware that sensitive materials can be compromised when shared via email, USB drive or cloud storage. 'In-channel' encryption doesn't help if the users' logon or email credentials have been compromised or if materials are sent to the wrong person. 'Out-of-channel' prevents data loss in these circumstances.

### ***Your choice of Digital Certificate or Password Protection***

When it comes to sharing sensitive materials, there is a trade-off between first-use and frequent-use convenience. Everyone understands passwords, easy to share via SMS but a bit inconvenient, for sharing materials frequently. DPM easy2Go offers a password vault for storage of passwords or the option to dispense with passwords and further enhance securing by sharing certificates.

## Case Study

A leading bank enhanced client data protection and compliance instantly with DPM easy2Go, instilling trust among 10,000 employees, customers and regulators. The user-friendly interface, simple deployment, and the complimentary reader version available without licensing fees were highly appreciated features.

## Product details

- DPM easy2Go supports Window and Apple Mac environments
- Cross platform support is under development for Apple iPhone/iPad & Android phone and PADS
- Receiving party also required to install a copy of DPM easy2Go – free download forever for the reader edition.

## Benefits

- Fits with existing work habits, easy to deploy and intuitive use
- Use demonstrates commitment to data privacy protection
- Password vault for storing encryption passwords and certificates
- Use exiting certificate or Randtronics certificate manager
- Encryption expiry date user configurable
- Software is downloadable from Microsoft or Apple store.

## Prices and license types

- Reader edition is free for use; Encryption edition price on enquiry.
- License types
